End November 2014

Welcome to the End of November Edition of What's Emerging

Welcome to the end of November edition.

Things generally wind down for us a bit at this stage of the year as most of the work we do is with boards or senior management and most people do not want to work on foresight work with part of their teams away over the summer break. We will have one more newsletter before Christmas and then there will be a break until the middle of January. If you wish to contact us we are still around so email us at: info@emergentfutures.com.

We hope that you continue to find then newsletter interesting and useful.

Cheers,

Paul Higgins, Sandy Teagle, Prafulla, Syed Muqthar, and Samantha Kyle-Little

What are we writing about?

Paul's presentation to the Leadership Victoria Director Dynamics Program on embracing uncertainty is now up on our website. You can see our presentations by going to www.emergentfutures.com and looking under latest downloads on the home page. As always our presentations are designed to be an experience for the audience rather than asset of detailed notes. If you are interested in an online run through of any of our presentations then please contact us at info@emergentfutures.com. This is also a service that we offer clients during the presentation preparation phase for conference and workshops to fine tune our focus on the audience and the client requirements.

Business Tips

How to Be Efficient: Dan Ariely's 6 New Secrets to Managing Your Time

A scanner the size of an iPhone that you could hold up to a person's chest and see a vivid, moving, 3D image of what's inside is being developed by entrepreneur Jonathan Rothberg.

What's Emerging

We Now Spend More Time Staring at Phones Than TVs

Marketers think of smartphones and tablets as the "second screen," places where people direct their attention during commercial breaks on TV. It may be time to reverse those distinctions. [Read More...](#)

A wounded economy

VLADIMIR PUTIN is not short of problems, many of his own creation. There is the carnage in eastern Ukraine, where he is continuing to stir things up. [Read More...](#)

How Magic Leap Is Secretly Creating a New Alternate Reality

Don't you hate it when someone claims to have a magical new technology, but won't tell you how it works? When I saw that a super stealthy startup called Magic Leap had raised \$542 million to make animals appear out of thin air, I resolved to find out exactly what was going on. Here's what I found.
